THE JOINT CHIEFS OF STAFF

JOINT INTELLIGENCE COMMITTEE

WASHINGTON 25, D. C.

18 December 1946

MEMORANDUM FOR

STAT

Subject: Joint Dictionary of Military Terms For Army-Navy Use.

Enclosure: Copy of J.I.C. 383

Your request for a copy of J.I.C. 383 has been cleared with the Secretary, Joint Logistics Plans Committee.

You will realize of course that the subject study is not yet an approved JLPC paper.

R. U. HYDE,

Secretary.

JCS review(s) completed.

RESTRICTED

COPY NO. _____

J.I.C. 38317 December 1946JOINT INTELLIGENCE COMMITTEEJOINT DICTIONARY OF MILITARY TERMS FOR ARMY-NAVY USE

References: a. J.C.S. 1373 Series
 b. LHM 57/3 of 6 November 1946
 with Encl. A thereto (Joint
 Dictionary of Terms for Army-Navy Use.)

Note by the Secretary

The Joint Logistics Plans Committee in reference b requested the recommendations of JIC as to the following items, and enclosed a copy of "Joint Dictionary of Terms for Army-Navy Use" for reference in connection therewith.

"(a) Changes in terms and definitions concerning matters under your cognizance which have been recommended by other agencies....."

"(b) Any other desirable changes in the terms or definitions contained in the dictionary which concern matters under your cognizance. Terms considered to be under your cognizance have been indicated by a check mark in Enclosure "A".

"(c) Additional terms and definitions concerning matters under your cognizance which have been recommended by other agencies....."

"(d) Any other additional terms and definitions concerning matters under your cognizance the inclusion of which appears desirable."

"(e) Terms or definitions concerning matters under your cognizance which should be omitted because of the lack of "peculiar military significance or substantial joint use"....."

The request (with Enclosures) was referred to JIS for preparation of response. It was considered impracticable to further reproduce the enclosures.

The enclosed memorandum to the JLPC with Enclosures "A" and "B" thereto, was prepared by the JIS, and was approved by the JIS on behalf of the JIC as the response to reference b.

R. U. HYDE,
 Secretary.

MEMORANDUM FOR THE JOINT LOGISTICS PLANS COMMITTEE

Subject: Joint Dictionary of Military
Terms for Army-Navy Use

References: a. JCS 1373 Series
b. LPM-57/3, Memorandum for JIC
from JLFC of 6 November

1. In response to the request in reference b, the Joint Intelligence Committee reviewed the designated definitions in the "Joint Dictionary of Military Terms for Army-Navy Use" and recommends the changes shown in Enclosure "A".
2. Definitions which the Joint Intelligence Committee recommends be added to the Joint Dictionary are given in Enclosure "B".
3. Where no comment or change has been given regarding the definitions checked as being matters under cognizance of the Joint Intelligence Committee, the JIC accepts the definitions in the Dictionary (Enclosure "A" to LPM-57/3).

of-the-camera-from-the-vertical.--An-oblique-may-be
square-or-rectangular-in-shape,-but-the-territory
covered-is-in-the-shape-of-a-trapezoid.--High-obliques
are-taken-with-the-camera-axis-about-60-degrees-from
the-vertical-and-usually-include-the-horizon.--Low
obliques-are-taken-with-the-camera-axis-about-30
degrees-from-the-vertical-and-do-not-include-the-
horizon.--See-also-OBLIQUE-LINE-OVERLAP;

high-altitude-----An-oblique-photograph-taken
at-any-altitude-above-300-feet,-according-to-the
weather,-air-situation,-and-the-purpose-for
which-it-is-required.

low-altitude-----An-oblique-photograph-taken
from-an-altitude-of-200-to-300-feet.

A photograph taken with the camera axis intentionally
directed between the horizontal and the vertical.

high oblique - An oblique photograph in which the
apparent horizon is shown.

low oblique - An oblique photograph in which the
apparent horizon is not shown.

Page 3 AERIAL PHOTOGRAPH, OVERLAPPING

Two-vertical-aerial-photographs-taken-from-the-same
elevation-and-from-adjacent-positions. A photograph
taken at an exposure station adjacent to the exposure
station of another photograph in such a manner that a
portion of one photograph shows the same terrain as
shown on a portion of the other. The pair is used to

RESTRICTED
JIC 383

RESTRICTED

give the effect of actual relief or projection when examined stereoscopically. Also called STEREOSCOPIIC PAIR (STEREO-PAIR).

Page 4 AERIAL PHOTOGRAPHY, INTERPRETATION OF

The process of determining, through the use of aerial photographs, the identity and physical characteristics of features of terrain, works of man, and the nature and extent of ground, sea, or air activity. Applied to military purposes, this process is limited to the extraction of that information which pertains to terrain and to the capabilities, installations, strength, dispositions, and activities of the enemy relating to his war effort.

→ Page 37 CAPABILITIES, ENEMY

1. The courses of action of which the enemy is physically capable and which can possibly ~~hinder or prevent~~ affect the accomplishment of one's own mission.
2. Enemy capabilities are considered in the light of such factors as the effects of time, space, terrain, strength, and dispositions, etc.

Page 44 CHART, AERONAUTICAL

A map intended primarily for use in air navigation, and showing features that are easy to see and identify from an aircraft in flight. ~~Such a map is either sectional-(scale-1:500,000)-or-regional-(scale 1:1,000,000).~~

Page 44 CHART, AIR-SEA SEARCH AND RESCUE

A chart having the reference point at the center, with bearing and distance lines overprinted, designed to assist pilots in giving accurate position reports, and for use in the control and direction of air-sea rescue missions.

RESTRICTED

JIC 383

RESTRICTEDPage 50 COMBAT INFORMATION CENTER

→ An agency within a ship established to assist command by collection, rapid evaluation, and dissemination of tactical information. A second function may be the controlling of aircraft when authority is delegated by command. A combat information center is an office ^{room} charged with the function and responsibility of keeping the commanding officer, and higher commands embarked, together with other control stations, informed of the location, identity ~~of~~ and movements of friendly and/or enemy aircraft, large missiles, and surface ships within the air defense area. In addition, when the tactical situation indicates and the limitations of space and availability of trained personnel permit, any or all of the following functions may be required of CIC:

- (1) Target indication.
- (2) Control of aircraft in the air defense area,
offensive and defensive.
- (3) Control of small craft.
- (4) Navigation and piloting.
- (5) Control of radar countermeasures.
- (6) Assistance in ASW operations. ^{anti submarine warfare}

Abbrev: CIC.

→ ✓ Page 58

COUNTERESPIONAGE

^{effective}
The All measures taken to prevent foreign espionage activities or to confuse enemy ~~series~~, foreign secret agents.

✓ Page 58

COUNTERINTELLIGENCE

All measures taken to destroy the effectiveness of the enemy's intelligence. Counterintelligence is that aspect of intelligence relating to all

RESTRICTED

- 3 -

Enclosure "A"

RESTRICTED

security control measures, both active and passive,
designed to insure the safeguarding of information,
personnel, equipment, and installations against the
espionage, sabotage, or subversive activities of
foreign powers and of disaffected or dissident
groups or individuals which constitute a threat to
the national security.

→ Page 59 COUNTERRECONNAISSANCE

All measures taken to ~~screen a command from~~ ^{prevent}
hostile observation, by hostile forces.

Page 73 DISSEMINATION - See INTELLIGENCE

The process of distributing military intelligence
in such a way as to get it to the proper persons
needing it, to get it to them promptly, and to get
it to them in usable form.

→ Page 79 ESPIONAGE

The use of spies to gain information of military
value about the enemy. The use of secret agents to
obtain information concerning a possible or actual
enemy, or theater of operations including terrain
and weather.

Page 97 GRID, MILITARY

A network of straight north-south and east-west
lines put on a military map, dividing it into
squares to permit accurate location of points or
places. The distance between lines on the map
represents a distance on the ground of 1000 to
100,000 yards, depending on the scale. A network
of squares made of north-south lines showing dis-
tance east of an arbitrary origin, and east-west lines
showing distance north of the same reference point.
The distance between grid lines is 1,000, 5,000 or
10,000 yards (or meters) depending on the scale of
the map.

RESTRICTED

Page 104

INFORMATION, ESSENTIAL ELEMENTS OF

That information about ^{a foreign nation} the enemy, the terrain, hydrographic conditions, or meteorological conditions in territory not under our control which a commander needs in a particular situation in order to make a sound decision, to conduct a maneuver, to avoid being surprised, or to formulate details of a plan of operation. The essential elements may also include information requested by higher, lower, adjacent, supporting, or attached units.

intelligence-in-whatever-form-is-needed-by-the-commander-and-armed-forces-being-served.--3.-The-staff-division-or-staff-section-of-a-unit-of-the-armed-forces-which-produces-intelligence-and-plans-and-supervises-counterintelligence-measures. Intelligence includes the work of collecting, evaluating, analyzing, interpreting, and disseminating information, in peace and in war, about foreign powers and their armed forces, the countering of foreign powers' efforts to obtain intelligence, and also the organization which performs these duties.

✓ Collection - The process of assembling and organizing intelligence information.

✓ Evaluation - The critical and systematic analysis of ~~an item~~ of information in order to determine its pertinence, credibility, reliability, and accuracy.

✓ Analysis - The process of examination to distinguish component parts, determining various interrelationships and combining the relevant elements into a whole.

✓ Interpretation - The process of explaining probable meaning and significance in terms of past, present and future factors of intelligence information.

✓ Dissemination - The process of distributing intelligence and information in such a manner as to insure that it reaches the individuals or units needing it, in usable form, and in accordance with its urgency.

Enclosure "A"

RESTRICTEDENCLOSURE "D"ADDITIONAL TERMS AND DEFINITIONSANALYSIS - See INTELLIGENCECOLLECTION - See INTELLIGENCEEVALUATION - See INTELLIGENCEGRID, AIR DEFENSE

A grid system based on latitude and longitude and covering the world from 80° N to 80° S latitudes. It is used to facilitate the designation and transmission of positional information of aircraft in flight.

GRID, JAN

Joint Army-Navy Grid system is a grid system covering the entire surface of the earth adopted to afford security in referring to geographical positions. There are twelve "master" areas. It is set up by prescribing the location of the origin and the size of the grid squares, both in terms of latitude and longitude. Special JAN grids based on above principle may be issued by local authorities.

GRID, POINT-DESIGNATION

System of lines that may be drawn on an aerial photograph to divide it into squares so that points on the photograph can be readily located. The lines are drawn 1.44 inches apart regardless of the scale of the photograph. This grid is used when variations of scale in the photograph make a military grid useless.

INFORMATION, PROCESSING OF - See INTELLIGENCEINTERPRETATION - See INTELLIGENCERESTRICTED
